Forecast for Monday 07 Feb 2022

Weather: A dry start to the day, but outbreaks of rain, preceded briefly by snow, will spread east across all ranges during the morning. The rain will ease off for a time in the afternoon before further rain spreads from the northwest, this becoming heavy at times. The rain will clear to showers across Lochaber during the evening, these heavy at times and turning to snow over the highest summits.

Chance of cloud-free hill tops above 800m: 80% soon becoming 20%, becoming 40% across Lochaber during the evening.

Low Cloud and visibility: Clouds well broken and above the summits at first, but extensive cloud forming above 300 meters in the rain, with patches down to 200 meters around western coastal ranges. The cloud will turn more patchy across Lochaber during the evening.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Milder than of late, but feeling bitterly cold in the severe gales over the summits, with poor visibility making navigation difficult. Snow melt will lead to wet conditions under foot over the lower slopes, and slippery conditions over the higher slopes and summits.

Forecast for Tuesday 08 Feb 2022
Weather: A brighter day with a mixture of sunny spells and showers, these most frequent in the west with snow over the higher slopes and summits, leading to temporary blizzard like conditions.

Maximum wind: West to southwesterly 35 gust 50 mph.

Chance of cloud-free hill tops above 800m: 40%, locally 60% towards the Trossachs.

Low Cloud and visibility: Rapid deteriorations in the showers with very poor visibility and cloud down to 400-500 meters. Good visibility outside of the showers, although low cloud may be slow to clear from the summits.

Temperature: **Glens:** Plus 7
At 800m: Zero
Freezing level: 800-1000 meters
